AT the time of the foundation of the Royal Institute of British Architects there existed in Lincoln's Inn Fields the Architectural Society, the primary objects of which were the advancement and diffusion of architectural knowledge, and its ultimate intent to form a British School, with Library, Museum, Professorships and periodical exhibitions, the want of which was then beginning to be greatly felt by students.* Instituted in 1831, the Architectural Society had for its governing body in 1834-35 William Barnard Clarke as President, Thomas Henry Wyatt as one of the Vice-Presidents, George Mair as Hon. Secretary, with Benjamin Ferrey among the ordinary members. In 1834 it became evident to a few architects of established reputation that the profession required a more influential representative institution than that which already existed, and an Address was circulated among the profession pointing out that though few of the arts and sciences were left without a Body associated for their promotion and cultivation, Architecture, as an art embracing the whole circle of the sciences, was in this country destitute of such an establishment.

The first meeting of the founders of the Institute† was held at the Thatched House Tavern, St. James's Street, on the 2nd July 1834, when

* An earlier society still was the London Architectural Society, established in 1806, probably the first institution formed by professional men with aims and objects similar to those of the present Royal Institute. By the rules of this Society members were required to produce annually, according to a rotation and time agreed upon, an architectural design never before in any way made public, consisting of at least one plan, elevation, and section, and accompanied with observations, critical and explanatory, under forfeiture of two guineas; also an essay on some subject connected with civil architecture, under forfeit of half-a-guinea. These designs, observations, and essays were discussed at General Meetings, and every member absenting himself for two successive nights was fined 5s., and also 5s. for every additional night of absence unless prevented by illness or a distance of ten miles from the place of meeting. The Society probably became extinct before the formation of the Architectural Society in 1831.

What was probably a forerunner of the London Architectural Society was a club called the Architects' Club, which was founded in 1791 and held its meetings at the Thatched House Tavern. The treasurer was Samuel Pepys Cockerell, father of Professor Cockerell (second President of the Institute), and grandfather of Frederick Pepys Cockerell (for many years Hon. Secretary). Among the original members were Sir William Chambers, Robert Adam, Robert Milne, John Soane, Thomas Hardwick, James Wyatt, George Dance, S. P. Cockerell. (See article by Mr. Harry Sirr, JOURNAL R.I.B.A. 7th January 1911.).

† The last surviving original member of the Institute, Professor Donaldson, died in 1885. He took a prominent part in the foundation. His letter convening the preliminary Meeting was as follows:—

7 Hart Street, Bloomsbury Square : 8th May 1834.

DEAR SIR,—Some of the following gentlemen, all of whom, as well as yourself, have received a circular from Mr. Rainy, are anxious to have a preliminary Meeting to talk over and consider the objects and prospects of the proposed Institution of British Architects, and will meet at Mr. Rainy's room, 14 Regent Street, on Tuesday

the Address setting forth the aims and objects of the proposed Institute was adopted. Endeavour was made to secure as members architects of prominent position and unimpeachable character, educated for and following their profession as an art, and free from those conflicting relations with trade which frequently existed in the early part of the century and prevented that implicit confidence on the part of the public which should enable a client to regard his architect not only as his agent, but as his friend and adviser. A second meeting, for the enrolment of members, was held on the 6th August 1834; and the Council, elected by ballot on the 3rd December following, and consisting of Messrs. Robinson, Kay, and Gwilt as Vice-Presidents, Messrs. Donaldson and Goldicutt as Hon. Secretaries, and Messrs. Barry (afterwards Sir Charles Barry), Basevi, Decimus Burton, Fowler, Philip Hardwick, Kendall, J. B. Papworth, and Rhodes, met for the first time on the 10th December at the Thatched House Tavern. A few weeks afterwards the Earl de Grey was elected President. The junction of the Architectural Society with the Institute was effected in 1842.

The Opening General Meeting of the Institute was held on the 15th June 1835. The President's Address, with that afterwards delivered by Professor Donaldson, will be found in the *Institute TRANSACTIONS*. Sir John Soane, Professor of Architecture at the Royal Academy, evinced his sympathy with the newly established body by giving a donation of £750 for such purposes as might appear most conducive to its advantage.

The Royal Charter was granted by King William IV. on the 11th January 1837. On the 8th August of the same year Queen Victoria became Patron, and was subsequently associated with the Prince Consort, who at all times manifested his interest in the Institute's proceedings, on one occasion, in 1842, acting as Chairman of the Council Meeting and afterwards presiding at the General Meeting.

A further and lasting mark of the Royal favour was shown in 1848 by the foundation by Queen Victoria of the Royal Gold Medal, since annually conferred by the Sovereign on some distinguished architect, or man of science or letters connected with architecture, on the recommendation of the Institute.

On the 18th May 1866 by Royal command the style of the Institute was altered to the "Royal" Institute of British Architects.

King Edward VII., Patron from 1863 till his death in 1910, continued the presentation of the Annual Gold Medal.

His present Majesty King George V., on his accession to the Throne, graciously intimated his pleasure to continue the Royal Patronage and the presentation of the Gold Medal.

In 1887, in order to bring the powers of the Institute more into line with the work it aspired to accomplish, and to render the fact of membership to a certain extent a test of proficiency, the Supplemental Charter of the

evening next, at half-past seven o'clock, when the favour of your attendance is earnestly desired. The chair will be taken at eight o'clock precisely.—I am, my dear Sir, yours very faithfully,

THOS. L. DONALDSON.

The names appended were Messrs. Atkinson, Barry, Basevi, Bellamy, Blore, Decimus Burton, Cressy, Fowler, Goldicutt, Gwilt, Hardwick, Kay, Kendall, Lee, Papworth, Parker, Sir John Rennie, Rhodes, Robinson, Seward, Taylor, and Wallen. The italics denote those who attended.

50th Victoria, conferring among other privileges power to hold examinations and issue certificates or diplomas, was granted, the document receiving the Royal Sign Manual on the 28th March 1887.

A further Supplemental Charter (8th Edward VII.), granted 11th January 1909, provided for a temporary class of Licentiates to be elected by the Council, made fresh provisions respecting the qualifications of candidates for Fellowship and the granting of diplomas, and extended the educational functions of the Institute.

In 1924 the proposals of the Council for the amalgamation of the R.I.B.A. and the Society of Architects with a view to the unification of the profession and the promotion of a Registration Bill were approved by the general body of the R.I.B.A. and by the Society of Architects.

The Supplemental Charter enabling the amalgamation agreement to be carried into effect received His Majesty's sanction in February, 1925. Among other important provisions the new Charter also enabled Licentiates to be constituted as full corporate members, gave equal voting rights to all Fellows, Associates and Licentiates, and entitled them to use the title "Chartered Architect." It further provided for the formation of a non-corporate class of subscribers, and gave the Council power to take a Referendum on important issues.

The new Bye-laws were approved at a meeting of the Privy Council on the 4th March, 1925, and among certain other improvements in the machinery of the R.I.B.A. provided for the reconstitution of the Council, so as to secure representation for all sections of membership and for the Allied Societies.

Following on the completion of the provisions of the amalgamation agreement the Society of Architects went into voluntary liquidation in June, 1925, and thereupon property of the value of over £10,000 was transferred to the R.I.B.A. This included the Society's leasehold premises at No. 28, Bedford Square, and invested funds amounting to £4,588, of which £3,263 was earmarked for developing and maintaining architectural scholarships.

THE INSTITUTE PREMISES.

The first rooms of the Institute, engaged early in 1835, were at 43 King Street, Covent Garden, better known as Evans's Hotel, a building said to have been designed by Inigo Jones, and immortalised by Thackeray in *The Newcomes*, in the description of "The Cave of Harmony." In 1837 rooms were taken at No. 16 Grosvenor Street, where for twenty-two years the work of the Institute was carried on. The necessity of acquiring larger and more convenient premises led eventually to the formation of the Architectural Union Company, which was established, in the terms of its articles of association, "for the purpose of providing accommodation for the different societies connected with architecture, and especially for the Royal Institute of British Architects and the Architectural Exhibition." Sir Charles Barry was Chairman of the Company, Mr. (afterwards Sir William)

Tite, Deputy Chairman, and a number of prominent members of the Institute were Directors. The then President, the Earl de Grey, presented to the Institute twenty shares in the Company free of all further calls. The Architectural Union Company, having purchased the property No. 9 Conduit Street, constructed the Galleries (afterwards known as the Conduit Street Galleries, and later as the Maddox Street Galleries) at the rear of the house. The Institute was assigned the entire suite of apartments on the principal floor (the present Library rooms), with separate staircase, a large room for casts, models, etc., and apartments for an attendant in the basement and upper floors. The premises were formally opened by Earl de Grey on the 7th November, 1859.

In 1890 the Institute took over the ground-floor and basement, now used as the Secretary's offices, and in 1897 acquired the second floor, where are located an annexe to the Members' Common Room, the Library store-room, and the typists' rooms.

In 1909 the Institute secured the leasehold interest in the Galleries which the then tenants held from the Architectural Union Company, and entered into possession of the entire building. At this date also, the Institute holding a considerable number of shares in the Company, advantage was taken of an opportunity to acquire the remainder, and in 1910 the Institute became practically tenant of the property in perpetuity, the lease, which is held direct from the Corporation of the City of London, being renewable on the periodical payment of a nominal fine.

Of the three Galleries in the rear of the building, the Great Gallery is used for General Meetings and, with the East Gallery, for the Examinations and for exhibitions of drawings, etc. The West Gallery, which contains the fine collection of portraits of Past Presidents, the work of eminent contemporary artists, serves as a Members' Common Room.

In 1922 the freehold of a piece of land adjoining the Maddox Street Corridor was purchased, and the reconstruction of the Great Gallery with a separate corridor from the Conduit Street Entrance direct to the enlarged East Gallery—now used as a Council Room—was completed in 1924.

With a view to the further and much-needed extension of premises the Council purchased in 1921 the Corporation leasehold of the adjoining building in Conduit Street, No. 10. The leasehold is perpetually renewable without fine and therefore practically a freehold.

In 1925 the premises of the late Society of Architects at No. 28 Bedford Square came into the possession of the Institute. The premises are held on lease from the Bedford Estate for a term of years expiring in 1947, and consist of general offices on the ground floor, Council and Committee rooms (which are let for arbitrations, meetings, etc.) on the first floor, and residential rooms on the second and third floors. There is also an atelier at the rear of the premises, and this has been placed at the disposal of the Architectural Association for the time being.

THE COUNCIL DINNER CLUB.

The Council Dinner Club was founded during the presidency of the late Mr. Charles Barry (1876-79), to give Members of Council an opportunity of dining together in the interval between the close of a Council Meeting

and the opening of a General Meeting of the Institute. It consists of all Members of the Council for the time being, past Presidents, past Vice-Presidents, and such other past Members of Council as the Club desires to elect. One of the functions of the Club is to entertain foreign architects of distinction visiting England, readers of Papers at General Meetings, and others whom the Institute would desire to honour. The Club is entirely self-supporting.

THE R.I.B.A. TRAVELLING CARDS.

Members, Students, and Probationers R.I.B.A. can obtain from the Institute a travelling card, or credential for travel abroad, available for a stated period. Persons requiring the cards for use in Italy must have them visé'd by the Italian Consul of their district. Cards are also available for use in the United Kingdom. Applications for the cards must be made in writing to *The Secretary R.I.B.A.* at the Office of the Institute; and in the case of non-members, the application must be accompanied by a letter from a member.

ASSESSORS IN COMPETITIONS.

Members of the Institute who have been requested to act as Assessors subsequent to the conditions of the Competition having been drawn, should obtain a copy of the conditions and consider their conformity with the Regulations issued by the Royal Institute, and should also notify the Secretary of the Institute that they have been asked to act.

REGISTER FOR ASSISTANTS SEEKING EMPLOYMENT.

This Register, kept at the office of the Institute, contains applications for varieties of work connected with the profession. The Book is always open to architects' assistants, improvers, pupils, and clerks-of-works; also to young architects desirous of becoming known to members of the Institute through their drawings or other work. Applicants desirous of being registered should give the following particulars:—(1) name and address; (2) age; (3) salary per week; (4) qualifications; (5) references. On obtaining an engagement the applicant should at once inform the Secretary, in order that the fact may be noted in the Register.

Architects, whether members of the Institute or not, will be furnished on application with the names and addresses of persons desiring employment as assistants, improvers, or clerks-of-works, as the case may be. Architects applying for assistants should give the following particulars of their requirements:—(1) whether temporary or permanent engagement; (2) junior or senior assistants; (3) particulars of duties and style of work; (4) salary offered.

REGISTER OF ARCHITECTS WILLING TO TAKE RECOGNISED SCHOOLS STUDENTS IN THEIR OFFICES.

On the recommendation of the Board of Architectural Education, the Council have decided to establish at the office of the R.I.B.A. two registers:

- (1) A register of advanced students of recognised schools.
- (2) A register of the names of architects willing to take such students.

The intention is in this way to assist advanced students up to the stage of the completion of their qualifications for exemption from the Final Examination; one of the qualifications for exemption from the Final Examination being twelve months' experience in an office during the fourth and fifth years of the school course.

The Council hope that general use will be made of the registers, and that as many architects as possible will place their names upon the register.

SUGGESTIONS GOVERNING THE PROFESSIONAL CONDUCT AND PRACTICE OF ARCHITECTS

An Architect in practice, if a Member or Licentiate of the R.I.B.A., is governed by established customs accepted and observed by the architectural profession, and more particularly by the Charter and Bye-laws of the Royal Institute which render him liable in the case of unprofessional conduct to reprimand, suspension or expulsion at the discretion of the Council.

The following may be considered to record in a general way the practice of architects and also to indicate a standard of conduct in any special cases not specifically referred to therein.

1. *An Architect is remunerated solely by his professional fees and is debarred from any other source of remuneration in connection with the works and duties entrusted to him. It is the duty of an Architect to uphold in every way possible the Scale of Professional Charges adopted by the Royal Institute. An Architect must not accept any work which involves the giving or receiving of discounts or commissions, nor must he accept any discount, gift or commission from contractors or tradesmen, whether employed upon his works or not.*

2. *If an Architect own, or have a commercial interest in, any material, device, or invention used in building, he must inform his client thereof, and must obtain his sanction before permitting it to be used in works executed under his direction.*

3. *An Architect must not publicly advertise nor offer his services by means of circulars. He may, however, publish illustrations or descriptions of his work, and exhibit his name on buildings in course of execution, including those where he is acting as Architect for alterations and additions, provided it is done in an unostentatious manner, and the lettering of his name does not exceed two inches in height. With the client's approval, any such boards may remain for a period not exceeding two months after the completion of the building provided they do not display "to let" or "for sale" or similar notices, but they may indicate that the plans can be seen at the Architect's office. Architects who are surveyors to recognised estates may announce land or sites or premises for sale or letting in connection with their appointments or when they are acting as Architects for the development of land or sites.*

4. *An Architect must not attempt to supplant another Architect, nor must he compete with another Architect by means of a reduction of fees or by other inducement.*

5. *In all cases of dispute between employer and contractor the Architect must act in an impartial manner. He must interpret the conditions of a contract with entire fairness as between the employer and the contractor.*

6. *An Architect must not permit the insertion of any clause in tenders, bills of quantities, or other contract documents which provides for payment to be made*

to him by the contractor (except for duplicate copies of drawings or documents) whatever may be the consideration, unless with the full knowledge and approval of his client.

7. *An Architect should not take any part in a competition as to which the preliminary warning of the Royal Institute has been issued, and must not take any part in a competition as to which the Council of the Royal Institute shall have declared by a Resolution published in the JOURNAL of the Royal Institute that Members or Licentiates must not take part because the Conditions are not in accordance with the published Regulations of the Royal Institute for Architectural Competitions.*

8. *An Architect must not act as Architect or joint Architect for a work which is or has been the subject of a competition in which he is or has been engaged as Assessor.*

9. *It is desirable that in cases where the Architect takes out the Quantities for his buildings he should be paid directly by the client and not through the Contractor except with the previous consent of the client.*

10. *The businesses of Auctioneering and House Agency are inconsistent with the profession of an Architect.*

11. *An Architect must not accept an appointment in any commercial firm in which the extent of his remuneration is affected by the profits of the firm.*

THE LIBRARY

THE Library of the Royal Institute of British Architects consists principally of books presented by their authors, members of the corporate body. Many have been received in large donations, others by bequest. From time to time standard works of reference are purchased, to meet the requirements of the professional student, as well as to maintain the special character and historic value of the collection. Not the least interesting portion of the Library is that which includes rare and valuable editions of Foreign Works, mostly presented by Hon. Corr. Members.

From the 1st October till the end of June the Library is open from 10 a.m. to 8 p.m. (Saturdays 5 p.m.); in July and September it closes at 7 p.m. (Saturdays 2 p.m.). The Reference Library is closed during the whole of August, but Loan books may be received or issued between the hours of 12 and 2 daily (Saturdays 1 p.m.).

All Probationers, Students, and Qualified Candidates for Associateship on registration in the books of the Institute, are furnished with a card of admission, and such card must be shown by the reader at every visit. Cards are also granted on the recommendation of members of the Institute, professors of colleges, schoolmasters, and others, who are required to certify, on a form to be obtained at the Institute, that the persons they recommend are fit to be admitted to the privileges of the Reference Library and the Loan Collection.

The Council afford facilities to architects and others, not members of the Institute, to consult books in the Reference Library and to have the use of the Loan Collection. Applications should be made in writing to *The Secretary R.I.B.A.* at the Office of the Institute.

RULES TO BE OBSERVED IN THE LIBRARY.

THE REFERENCE LIBRARY.

1. Everyone using the Library must sign the Attendance Book placed at the entrance.
2. The front and back rooms are reserved for members of the Institute, but non-members are allowed access to any special books of reference there on application to the officer in charge.
3. No book or other work forming part of the Reference Library is allowed to be taken from the premises of the Institute, except by special resolution of the Council.
4. Readers desiring to trace are required to apply to the Librarian or official in charge for a form, which must be duly filled up, giving particulars of the work and specifying the portion it is intended to trace. Soft pencils only may be used in tracing. In the case of rare and other valuable works, in order to preserve the print from injury, isinglass will be supplied for the purpose of tracing.
5. No compasses of any kind may be applied to any of the works, and the use of ink is prohibited at any table on which rare or costly works are placed.
6. Readers are requested to inform the official in charge when they have finished with any work, in order that it may be restored to its place.
7. Silence is necessary in the Library, and all oral communications should be conducted in an undertone.

THE LOAN LIBRARY.

8. The Loan Library is open for the issue and return of books during the same hours as those appointed for the Reference Library.

9. Not more than one volume at a time is issued to any one borrower, except by permission of the Librarian, and no volume may be retained longer than fourteen days, unless a written renewal from the Librarian has been obtained [see No. 12].

10. Application for works must be made personally, except in the case of Members, Students and Probationers of the Institute, who may send a written request by a person authorised to receive and sign for them, or may apply in writing to the Librarian for the volume to be sent by post or rail.

11. A borrower is required to sign a voucher for each book he takes out, and is responsible for the work so long as the voucher remains uncanceled. A book will not be accepted as returned unless it be delivered by hand to the official in charge at the Library during Library hours, and the borrower's receipt obtained in exchange. In the case, however, of a member of the Institute borrowing through the post, his letter of request shall be countersigned by the Librarian on the day when the volume is despatched, and shall be regarded as the borrower's voucher. Volumes shall be despatched at the cost of the Institute and returned at the cost of borrowers. On the return of a book the Librarian shall at once send the member a receipt. Books due for return on days when the Library is closed must be returned on the first following day when it is open.

12. Application for renewal must be made personally or by postcard in sufficient time to allow of the book being punctually returned if it cannot be renewed; if renewed or otherwise, a notice from the Librarian will be sent.

13. A fine of threepence must be paid for every day or portion of a day during which any volume is retained beyond the time allowed, unless the borrower can show a written renewal from the Librarian. And a fine of sixpence must be paid for every day or portion of a day during which any volume is retained after delivery at the borrower's address of a notice from the Librarian for its return (the day of delivery of such notice not included).

14. Borrowers are not to trace with ink or with a hard pencil, nor apply compasses of any kind to the works. Marking any book by writing, turning down leaves, etc., is strictly prohibited: this applies even to correction of a misprint, or to a single additional mark in a book, however much previously disfigured. Infringement of this rule will render the borrower liable to suspension from the use of the Loan Library. A borrower is liable to be called upon to replace at his own expense any work lost, marked, or injured while in his possession, or to pay a fine.

15. A borrower whose fines are unpaid will not be permitted to use the Loan Library; and if not a member of the Institute, he will also be debarred the use of the Reference Library.

THE Architectural Association (London) is carried on under the authority of the Literary and Scientific Institutions Act 1854. Its objects are to provide facilities for the study of Architecture, and to serve as a medium of friendly communication between the members and others interested in the study and progress of Architecture.

The President for the time being of the Architectural Association, provided he be a Fellow or an Associate of the Institute, is annually nominated as a member of the Council of the Royal Institute of British Architects.

The work of the Association is carried on at 34, 35 and 36 Bedford Square, W.C., where the General Meetings are also held. Members under the age of twenty-three years are allowed the use of the Library of the Institute and are furnished with passes for that purpose. The Association possesses a library, and there are reading and other rooms for the use of members, including a dining room.

A complete Course of instruction is given by means of the full-time Day Course in the School of Architecture. The Day School is under the direction of Mr. Robert Atkinson [F.], *Director of Education*, and Mr. Howard Robertson [F.], S.A.D.G., *Principal*, assisted by qualified masters and staff.

The Day School provides for five years of study, upon completion of which students are advised to enter architects' offices as Assistants.

The aim of the School is to provide for its students not only theoretical instruction in the Design and Engineering sides of architecture, but so to arrange its curriculum that the students, during their instruction, may find ample opportunity to gain practical experience in outside work or in the offices of practising architects.

The Council of the R.I.B.A. accept the Certificate issued upon satisfactory completion of the first three years of the Day School as granting exemption from the R.I.B.A. Intermediate Examinations. The A.A. Diploma, issued upon satisfactory completion of the full Five Years' Course, entitles the holder to exemption from the Final Examination of the R.I.B.A., with the exception of the examination in Professional Practice, and on passing the examination in this subject the holder becomes eligible for nomination for Associateship of the R.I.B.A.

THE ARCHITECTURE CLUB

THE purpose of the Architecture Club is to enlarge public appreciation of good architecture and the Allied Arts, and especially of the best work of to-day.

Members are either (a) architects, or (b) writers, or (c) persons interested in furthering good building, and membership is divided as near as may be equally among these three classes.

The Birmingham Architectural Association was founded in 1873 for the promotion of union and professional integrity among its several classes of members ; the establishment, as far as possible, of uniformity of practice ; the general advancement of architecture, and of the arts and sciences connected therewith. The Association consists of Fellows—architects who have been in practice at least three years ; Associates—architects not eligible as Members, architects' assistants and pupils ; Honorary Members—persons who are not architects, but interested in architecture and the allied arts ; Subscribers—persons engaged in the various crafts connected with the architectural art. The Annual General Meeting is held in April. General Meetings are held fortnightly on Fridays from the months of October to March.

Through the efforts of the Birmingham Architectural Association a School of Architecture has been founded at the Municipal School of Art, Birmingham, under the Directorship of Mr. W. H. Bidlake, M.A. [F.], Past President of the Association.

Sketching excursions are arranged for students, visits made to old buildings and to buildings in progress, and prizes offered for reports and sketches of the buildings visited. A permanent room is available for meetings, and the Library is open during the day.

ROYAL ARCHITECTURAL INSTITUTE OF CANADA.

590 Union Avenue, Montreal.

Hon. Secretary.

Alcide Chaussé, J.P., P.O. Box 304, Montreal.

The Royal Architectural Institute of Canada was founded as the Institute of Architects of Canada, 19th August 1907; was incorporated by Special Act of the Dominion Parliament, 16th June, 1908 (7 & 8 Edward VII, Chap. 82), under the corporate name of "The Architectural Institute of Canada," and was granted Royal permission to adopt the prefix "Royal" to its corporate name, 2nd June, 1909.

The Charter of the Institute was amended by a Special Act of Parliament, sanctioned 1st April 1912, and on 7th October 1912 the Council surrendered to a new Council, composed of the delegates of the various provincial associations of architects in Canada, all the assets and affairs of the Institute. This completes the Federation of all the Canadian architectural bodies, which has been the aim of the founders of the Institute since the date of its formation on the 19th August 1907.

The Federated Societies consist of the Alberta Association of Architects, the Manitoba Association of Architects, the Ontario Association of Architects, the Province of Quebec Association of Architects, the Saskatchewan Association of Architects, and the Architectural Institute of British Columbia.

The asterisk (*) denotes a Licentiate R.I.B.A.

The objects of the Royal Institute, as set forth in its Charter, are "to facilitate the acquirement and interchange of professional knowledge among its members, and more particularly to promote the acquisition of that species of knowledge which has special reference to the profession of architecture, and further to encourage investigation in connection with all branches and departments of knowledge connected with that profession." There are four classes of members—viz. (1) *Honorary Members*, who are persons eminent in Architecture or kindred sciences; (2) *Corresponding Members*, persons not residing in the Dominion of Canada, eminent as architects or archæologists, or in art, science or literature, who may render assistance in promoting the objects of the Royal Institute; (3) *Fellows*, who must have practised as architects for at least ten years; (4) *Associates*, architects having practised as architects for at least two years. A Code of Ethics, Schedule of Usual and Proper Minimum Charges, and Regulations for Architectural Competitions, were adopted in the General Annual Assembly on the 29th September 1908, held in Ottawa, Ont. The General Annual Meeting is held in February.

DEVON AND CORNWALL ARCHITECTURAL SOCIETY.

[Province : Devon and Cornwall. Headquarters : Exeter.]

Hon. Secretary : John Challice [A.], 7 Bedford Circus, Exeter.

The Devon and Cornwall Architectural Society, which was formerly known as the Devon and Exeter Architectural Society was founded in 1890. The title was altered in 1926, when rules, in accordance with those suggested

The asterisk (*) denotes a Licentiate R.I.B.A.

by the Royal Institute of British Architects, were adopted to take the place of those formerly in force. The objects of the Society are :—

To advance the art and profession of Architecture.

To consider and safeguard matters of Professional Practice.

To maintain and uphold the code of professional charges as laid down by the Royal Institute of British Architects.

To promote and afford facilities for the study of Architecture and to serve as a medium of friendly communication between the members and others interested in the progress of Architecture.

The membership consists of Fellows, Associates, Students and Honorary Members. *Fellows* must be practising Architects, not combining any other business with their profession of Architecture, except those of Land and Quantity Surveying, Land Agency and Valuing and Civil Engineering, and must either have served Articles to Architects of recognised qualifications, or be Members of the Royal Institute of British Architects, or Architect's Assistants who are Associates or Licentiates of the R.I.B.A. unless the Council shall see reason to relax this rule in any special case. *Associates* must be Architect's Assistants over 21 years of age. *Students* must be Architect's Articled Pupils, or day Students in any recognised Architectural School. *Honorary Members* must be persons who have rendered or may be in a position to render to Architecture and to the Devon and Cornwall Architectural Society such service as, in the opinion of the Council, entitle them to that distinction.

The area covered by the Society is divided into two districts, each forming a distinct branch. The branches are called "Exeter" and "Plymouth," and members may elect to belong to either branch. The centres are at Exeter and Plymouth respectively, and each branch has its own executive. Sessional Meetings are held from September to April. The Society is governed by a Council consisting of Officers elected annually and representatives nominated by the branches. The Society possesses a library for the use of members and prizes are offered annually to Associates and Students for Measured Drawings.

[Centre : Dublin.]

Hon. Secretary.

John J. Robinson [L.], 8 Merrion Square, North, Dublin.

The Royal Institute of the Architects of Ireland was founded in 1839 and incorporated in 1908. Students must have attained the age of nineteen years, and (a) have signed articles to serve for a period of at least three years as Apprentice to a Member or Fellow of the Institute, or of the Royal Institute of British Architects or of the Societies allied to it, or to an Architect approved by the Council, or who shall have satisfied the Council that they have received

adequate architectural training, and (b) who shall have passed such examination as may be from time to time prescribed, or shall have obtained an Architectural Degree in any recognised University. *Members* must be Architects of good repute who have attained the age of twenty-three years, and (a) who have been students of the Institute for at least two years; or (b) who have been engaged for at least seven successive years in practice as principals, and who are, in the opinion of the Council, fit and proper persons to be admitted to membership; or (c) who have passed the Associate Examination of the Royal Institute of British Architects. *Fellows* may be elected from the rank of *Members* by a general vote of registered *Members*, provided they are architects of good repute, and have attained the age of thirty years and been engaged for ten successive years in the practice of Architecture as principals. Persons not being in practice in Great Britain or Ireland, who are eminent for their works or scientific acquirements, are eligible to be associated to the Institute without any contribution, under the designation of *Honorary Members*, if resident within the United Kingdom, or of *Honorary Corresponding Members*, if resident abroad. Meetings of the Council are held the first Monday in the month at 11 a.m., except during July, August and September. The Ordinary General Meetings are held on a convenient Thursday in February, April, June and November. The Annual General Meeting is held in December, at which meeting the Council for the ensuing year is elected. There are Standing Committees for Professional Practice, Examination, Arts, and Publication, with special Committees for Ancient and Historic Buildings, and Housing of the Working Classes. The annual subscription for a Student is half a guinea, for a Member one guinea, and for a Fellow two guineas. A Journal of Proceedings is published annually.

LEICESTER AND LEICESTERSHIRE SOCIETY OF ARCHITECTS.

[Province: Leicestershire and Rutlandshire. Centre: Leicester.]

Hon. Secretary.

C. F. McL. Keay, 6 Millstone Lane, Leicester.

The Leicester and Leicestershire Society of Architects was founded in 1872. The objects of the Society are:—

(1) To maintain the alliance to the Royal Institute of British Architects; (2) To establish and maintain an acknowledged code of professional charges and practice;

(3) To obtain and consider information respecting competitions, town planning, and other matters affecting the profession, and, where practicable, to advise with committees or others desiring professional aid, and to endeavour to ensure equitable terms and awards; (4) To afford mutual assistance, by advice or mediation, in cases of misunderstanding, either among members themselves, or between them and their employers, or between the members and those employed in works under their superintendence, and generally to promote personal acquaintance and good feeling among members of the Society; (5) To establish an architectural reference library for the use of the various constituent members of the Society, and to advance the professional knowledge and interests of members of the Society in any way that may from time to time be deemed expedient.

The members consist of four classes, viz: *Hon. Members*—retired architects and others; *Full Members*—architects who have been engaged for not less than three years as principals; *Associate Members*—architects in practice, but not eligible as Full Members, or Associates R.I.B.A.; and *Assistant and Pupil Members*—assistants and pupils not less than 16 years of age, in the office of an architect, surveyor, or civil engineer in practice in the counties of Leicester or Rutland. The Society possesses a Library to which all its members have access, and has issued a schedule of professional charges and practice. Prizes are awarded by the Council of the Society to pupils and others for the best Architectural Sketches, Measured Drawings, and other Competitions, particulars of which are published in the Society's Annual Report. General meetings are held at various dates, due notice of which is issued to all members by the Honorary Secretary. The Annual General Meeting is held in April or May.

INSTITUTE OF ARCHITECTS OF NEW SOUTH WALES. [INCORPORATED.]

Secretary

Miss Chester, Royal Society's House, 5 Elizabeth Street, Sydney

The Institute of Architects of New South Wales, which was originally founded in 1871, was reconstructed in 1890, and formed into a corporate body with limited liability under section 54 of the Companies Act, 1874. The Memorandum of Association was amended by special resolution, confirmed by the Supreme Court of New South Wales, in December, 1920, and further amended in December, 1924, to provide for the fusion of the Institute of Architects, N.S.W., with the Architects Association, N.S.W. In this further amendment one class, "Member," was substituted for two classes, "Fellows" and "Associates."

Among the objects of the Institute are :—

The advancement of Architecture ; the examination of applicants for membership ; to represent generally the views of the profession, to preserve and maintain its integrity and status, and to suppress dishonourable and unprofessional conduct or practices ; to afford means of adjusting professional differences and to decide all questions of usage or courtesy in connection with the profession ; to promote professional good feeling and friendly intercourse amongst the members ; to watch over, protect and promote the interests of the profession generally ; to increase the confidence of the public in the profession ; to acquire, form, and maintain Art and Scientific Libraries and Museums ; to encourage and reward the study of Architecture by articulated pupils and others.

The Institute consists of Life Members, Members, and Honorary Members and such other classes or members, either subscribing or non-subscribing, as may be hereafter established by the Institute. *Life Members* are Architects who have been Members not less than ten years and who are elected Life Members for eminent services rendered to the Institute. *Members* are persons whose names appear as Fellows and Associates on the Register of the Institute of Architects, N.S.W., on December 1st, 1924, and thereafter persons engaged in the practice of architecture whose names appear on the Register of the Board of Architects, N.S.W., as entitled to practise and who have been duly elected under provisions in the Articles of Association. *Honorary Members* are gentlemen distinguished by scientific, artistic or literary attainments.

A Code of "Professional Practice and Charges," based upon that of the Royal Institute, but adapted to the different conditions of the State, was adopted in General Meeting on the 12th August, 1890, revised and adopted in General Meeting on 29th April, 1915, and again revised and adopted in General Meeting on 27th November, 1919.

The Annual General Meeting is held in January, February or March.

THE INCORPORATION OF ARCHITECTS IN SCOTLAND.

Telegraphic Address : "Architects, Edinburgh."

Secretary and Treasurer.

W. G. Walker, C.A. ; 15 Rutland Square, Edinburgh.

The Incorporation of Architects in Scotland was founded in 1916 and obtained a Royal Charter on 6th May, 1922.

The Incorporation maintains local divisions of its members known as Chapters, to each of which a definite portion of the whole territorial area of Scotland is assigned as its sphere of influence and action.

The Incorporation consists of three classes of Active Members : Fellows, Associates, and Students ; and two classes of Honorary Members : Honorary Fellows, and Honorary Corresponding Fellows. *Fellows* must be over thirty years of age, engaged as principals for at least five successive years, or engaged in professional education under an educational body in Scotland, recognised as such by the Council. *Associates* must be over twenty-one years of age and resident in Scotland, who, having completed a term of pupilage or the equivalent in the Schools, are engaged in the practice of Architecture as principals, or employed as assistants in an architect's office recognised as such by the Council, or are engaged in professional study or education. *Students* must be over sixteen years of age and resident in Scotland who are pupils in an architect's office or are engaged in the study of Architecture in the Schools or in such other way as the Council recognise as equivalent ; candidates for the studentship are recommended to have the Leaving Certificate of the Scottish Education Department or its equivalent. Associates who have been engaged as principals for five years and who are otherwise eligible for Fellowship must apply for admission as Fellows, failing which the Council may consider they have resigned ; in like manner Students on becoming eligible must apply for admission as Associates, or have their names removed from the list. Membership of the Incorporation is conditional on concurrent membership of the Chapter within whose territory the member's office is situated. Each Chapter has its territorial designation as a Chapter of the Incorporation, but it may, with the consent of the Council of the Incorporation, retain a proper name or title other than its designation as a Chapter of the Incorporation. The Chapters number five, viz :

ABERDEEN SOCIETY OF ARCHITECTS.

DUNDEE INSTITUTE OF ARCHITECTS.

EDINBURGH ARCHITECTURAL ASSOCIATION.

GLASGOW INSTITUTE OF ARCHITECTS.

INVERNESS ARCHITECTURAL ASSOCIATION.

The asterisk (*) denotes a Licentiate R.I.B.A.

Each Chapter has its own President and Council, who manage the affairs of the Chapter and prepare an Annual Report for submission to the Annual Convention of the Incorporation. Each Chapter Council appoints from its own Chapter representatives to serve on the Council of the Incorporation. The Presidents of the several Chapters are Vice-Presidents of the Incorporation. Each Chapter may make new Bye-laws for its own government subject to the approval of the Council of the Incorporation. The Annual Convention of all the Members is held in or about the month of June at the place fixed at the preceding Annual Meeting. At the Annual Convention the new President is elected and installed.

THE ASSOCIATION OF TRANSVAAL ARCHITECTS. (INCORPORATED).

67 Exploration Building, Commissioner Street, Johannesburg.

Registrar : Murray K. Carpenter, 67 Exploration Building, Johannesburg.

The Association of Transvaal Architects was incorporated by private Act No. 39 of the Transvaal, assented to by the Governor, Lord Selborne, on the 7th July, 1909.

The Act was established for the registration of persons publicly practising or entitled to practise publicly, as Architects, in the Transvaal, so as to distinguish qualified from unqualified persons ; to provide a qualification for admission to the register of Architects ; to restrict the use of the title Architect ; to provide a penalty for infringement of the use of the title.

Every person publicly practising as an Architect in the Transvaal must be registered as an Architect in pursuance of this Act. Other architects qualified to practise but employed in official or salaried positions may be, and in many cases are, similarly registered.

An applicant, to obtain registration as an Architect in the Transvaal must be resident in British South Africa and have attained the age of 21 years. He must have passed either (1) the examination for Associateship of the Royal Institute of British Architects, or (2) the examination for membership of the Society of Architects (London), or (3) the examination or examinations conducted by the Council of the Association and prescribed by the Bye-laws of the Association, or (4) some other examination which may be declared by the Governor-in-Council, by proclamation, to be equivalent to one or any of these examinations. He must also have had at least four years' professional and practical experience as an assistant to an Architect. If prior to or at the time of the coming into operation of this Act, the applicant was registered as an Associate or Fellow of the Royal Institute of British Architects or as a Member of the Society of Architects (London) or the Transvaal Institute of Architects or of some other Society or Institute of Architects which may by proclamation be declared by the Governor-in-Council to be of a standing equal to that of one of the said Institutions, no other qualification is required.

The Act created a body corporate named " The Association of Transvaal Architects " of which every person registered as an architect *ipso facto* is a member. There are two classes of members, practising and salaried, and a register of student pupils is kept.

The Association is empowered to give effect to the provisions of the Act and to promote the objects for which the Association was created. This power is exercised through a Council of twelve members elected annually by and from the members of the Association.

The Council consists of a President, two Vice-Presidents and nine other Members (of whom four may be in salaried employment). They are elected annually at the General Meeting of the Association held in February in each year. Members of Council retire annually but are eligible for re-election.

Special meetings of members are held as circumstances require or upon the signed requisition of twelve members. Quarterly informal meetings at which lectures are delivered and matters of professional interest are discussed are regularly held.

To the Council is given the power to receive applications for registration and to register qualified persons ; to fix the amount of registration fee not exceeding £5 5s. ; to hold examinations for applicants for registration ; to enquire into alleged unprofessional or dishonourable conduct on the part of any member, and if necessary to apply to the Supreme Court for the suspension or removal from the register of such offending member, and generally to manage and conduct the affairs of the Association.

The Association may from time to time by Special General Meeting called for the purpose, make, amend, or repeal Bye-laws for giving effect to the provisions of the Act, and for the furtherance of the objects of the Association, including : (a) Fixing the amount and date of due payment of annual subscriptions to be paid by members for the working expenses of the Association ; (b) Defining unprofessional or dishonourable conduct in an architect ; (c) Regulating the calling and holding of meetings ; (d) Regulating the holding of examinations ; (e) Fixing a scale of fees and charges which architects may make for their services.

The clerical work of the Association is carried out by a permanent official styled the Registrar. The work of the Council is assisted by several Committees, some of which include both members of the Association, outside the Council, and laymen interested in the work of the Association.

These Committees comprise Practice, Finance, Journal, Board of Examiners, Art and Education. Local Committees for the consideration of local matters meet from time to time in Pretoria and in the East Rand. Other activities in which the Association takes part are Representation upon the Executive Committee of the South African Scientific and Technical Association, the Seymour Technical Library, the British Standardising Committee, the Apprenticeship Committee for the Building Trades, Witwatersrand area, the Union Registration Executive for the furtherance of a Union Architects' Registration Act, the Union Practice Committee for the consideration of questions affecting architects generally within the Union, the Union Federal Council on Education, for the direction and co-ordination of Architectural education and examination throughout the Union. The Council through the Art and Education Committee has been instrumental in establishing the South African Academy, an annual exhibition of paintings, architectural studies, modelling, sculpture and craft work. By the initiative of the Association, coupled with monetary contributions from a considerable section of the members, the first Chair of Architecture in South Africa was established at the University of the Witwatersrand, Johannesburg.

The Association publishes its own quarterly official Journal under the title "*The S.A. Architectural Record.*" The Association has 143 members on the register at the present time—1926. The Association entered into affiliation with the Royal Institute of British Architects in the year 1923.

The present yearly subscriptions are:—Members practising in the Transvaal, £5 5s. ; Members practising outside the Transvaal, £1 11s. 6d. ; Members in salaried employment, £3 3s. ; and Members resident outside South Africa, £1 1s.

BRISTOL SOCIETY OF ARCHITECTS.

Hon. Secretary.

G. D. Gordon Hake, R.W.A. [F.], 1 The Paragon, Clifton, Bristol.

The Bristol Society of Architects was established in 1850, and reorganised in 1888. The Society exists for the purpose of maintaining the interests of the profession; for the educational advancement of local students; for the formation of a Library; and for insuring a uniformity and respectability of practice. The Members consist of *Fellows*—architects who have attained the age of thirty years, and who have been engaged as principals for at least five successive years in the practice of architecture; *Associates*—persons engaged in the study or practice of architecture who have attained the age of twenty-one years; *Honorary Associates*—persons not professionally engaged in practice as architects, who, by reason of their interest or ability in art, science, literature, or archaeology, or their experience in matters relating to architecture or building, may appear to the Council to be able to render assistance in promoting the objects of the Society; *Students*—persons engaged in the study of architecture, and who are not less than 16 years of age. Students have the privilege of attending ordinary meetings of the Society and of joining in discussions, but have no voice in the control of the Society's affairs. All Students are expected to qualify themselves for passing the Examinations of the R.I.B.A. The Annual General Meeting is held the second Monday in April, and monthly meetings are held from October to May, at which Papers are read and the business of the Society

transacted. The Society, in collaboration with the Royal West of England Academy, was instrumental during the year 1920-21 in establishing the School of Architecture of that Academy, opened by H.R.H. the Prince of Wales on 10th July, 1921. The School is carried on at the premises of the Academy, and is open to students of Architecture irrespective of age or sex. It is affiliated with the school of the Architectural Association of London, but is controlled as to its educational policy and curriculum by a Council of which the majority are members of the Council of the Society who are also Artist Members of the Academy. The curriculum closely follows that of the school of the Architectural Association, the teaching being by masters who are masters at that school. The general system of education is, however, that of combined apprenticeship to a practising architect and school work, though special cases are dealt with on their merits, and apprenticeship and office work are not compulsory.

THE ROYAL INSTITUTE OF THE ARCHITECTS OF WESTERN AUSTRALIA INCORPORATED.

Professional Societies' Rooms, 333 Murray Street, Perth, Western Australia.

Hon. Secretary.

S. Rosenthal, Warwick House, St. George's Terrace, Perth.

The Royal Institute of the Architects of Western Australia was founded in 1892, incorporated in 1902, and admitted to alliance with the Royal Institute in 1910. The Institute consists of Life Fellows, Fellows, Associates and Honorary Fellows. The Institute has power to grant diplomas or certificates in connection with examinations or otherwise in such manner as the Council may prescribe.

Since the passing of the Architects' Act, 1921, the Statutory Examination for registration has been adopted as the qualifying examination for Associate of the Institute; it embraces all the subjects included in the R.I.B.A. "Intermediate" and "Final" examinations, and is almost at a similar standard.

* * The objects for which the Institute was established and the qualifications and attainments of candidates for membership are, in general, similar to those of the Royal Victorian Institute—see page 513.

MEMBERSHIP OF THE ROYAL INSTITUTE OF BRITISH ARCHITECTS.

The training of Architects and the practice of architecture throughout the British Empire are controlled and guided by the Royal Institute of British Architects, a corporate body to which these duties have been entrusted by successive Charters granted since the year 1837 by King William IV, Queen Victoria, King Edward VII, and King George V.

Containing in its membership the great majority of the qualified Architects of the Empire, it stands at the head of a confederation of allied Architectural Societies, whose sphere of influence extends, in these islands, from Inverness to Cornwall, and overseas from Canada to New Zealand. With its headquarters in London, its thirty-seven Societies and Branches in Great Britain and Ireland, and thirty Societies and Branches in the Dominions overseas, it is an example of a closely-woven and far-reaching organization which cannot be paralleled in any other profession.

Its corporate membership comprises some 1,300 Fellows ("F.R.I.B.A."), some 2,400 Associates ("A.R.I.B.A."), and over 2,200 Licentiates ("L.R.I.B.A."). In addition to these it has three small classes of Honorary Members, some 130 in number. More than 1,600 Probationers, and 600 Students make up a total of over 8,200 persons directly associated with the Royal Institute. The Allied Societies contain a membership of over 5,000 Architects. By means of its Board of Architectural Education it controls and inspires the system of Architectural teaching throughout the Empire, and conducts the progressive professional examinations which qualify candidates for the corporate membership carrying with it the right to use the R.I.B.A. affix and the title "Chartered Architect." Its Practice Standing Committee is responsible for the principles of professional conduct and practice, and for the application of the R.I.B.A. scale of charges; its Competitions Committee regulates the conduct of architectural competitions; its Literature Standing Committee has the care of the finest architectural library in the world; its Art, Science and other Committees deal continuously with the problems that fall within their respective provinces.

PRIVILEGES OF MEMBERSHIP OF THE R.I.B.A.

1. PROBATIONER R.I.B.A.

A Probationer is entitled to use the R.I.B.A. Library, to attend general meetings (other than business meetings), and to the use of the R.I.B.A. register of assistants seeking employment.

2. STUDENT R.I.B.A.

A Student is entitled to use the R.I.B.A. Library; to attend general meetings (other than business meetings), to receive the R.I.B.A. Journal, Kalendar and Annual Report; and to the use of the R.I.B.A. register of assistants seeking employment.

3. ASSOCIATE R.I.B.A.

An Associate is entitled to the full privileges of membership. These include the use of the R.I.B.A. Library; the right to attend general meetings; to receive the R.I.B.A. Journal, Kalendar and Annual Report; to use the affix "A.R.I.B.A." and the description "Chartered Architect."

THE ASSOCIATESHIP.

The Royal Institute of British Architects desires that all those entering the profession should pursue a systematic course of education tested by progressive examinations, the passing of which forms the primary qualification for admission to its class of Associates. Associateship being in general the entrance class of membership, the Royal Institute requires as the qualification for it, evidence of a sound general and technical education. It has therefore encouraged the foundation and growth of schools of architecture in various parts of the country, and when these schools have reached a standard approved by the Royal Institute, certain of their courses have been "recognised" as affording evidence, on the part of those who have successfully graduated in them, that they have reached the standard of general and technical education required or have attained a stage towards it.

It is the desire of the Royal Institute, as recommended by the Board of Architectural Education, that Students within reach of such Schools should avail themselves of the opportunities these institutions afford, and take up the architectural courses provided, rather than submit themselves for the examination without such recognised training. A list of these Schools, with the degree of exemption they afford, will be found in the Sections II and III dealing with the Intermediate and Final Examinations.

The Secretary of the Royal Institute will be pleased to forward the Prospectus of any of the Schools of Architecture recognised for exemption from the R.I.B.A. Examinations.

PARA. 2. DESCRIPTION OF EXAMINATION FOR STUDENTS NOT IN SCHOOLS OF ARCHITECTURE RECOGNISED FOR EXEMPTION FROM THE R.I.B.A. EXAMINATIONS.

An Examination (Written, Graphic, and Oral) of Probationers is held by the Royal Institute, and some of the non-Metropolitan Societies allied thereto, twice a year, in the months of June and November, in accordance with the particulars given on the official form.

A Probationer R.I.B.A. who has attained the age of at least 19 years,

and who is desirous of qualifying for election as Student R.I.B.A., must make an application on the official form,* to be filled up as directed thereon; and to be accompanied by an admission fee of five guineas, which will be returned should the application be refused. He must also send with his application "Testimonies of Study" (see para. 3 below), accompanied by a certificate from a member of the Royal Institute, or other person of recognised position, that the Probationer is a proper person to be admitted to this Examination, and that the Testimonies of Study he submits are his own work.†

PARA. 3. THE TESTIMONIES OF STUDY.

The Testimonies of Study‡ required from Probationers R.I.B.A. must consist of eight sheets of drawings (half double-elephant—i.e., 27 inches by 20 inches), neatly and carefully finished. The subjects of the eight sheets of drawings must be as follows:—

A.—THE ORDERS. A façade or part of a façade of a building of recognised importance, showing the application of one or more of the Greek, Roman or Renaissance Orders of Architecture. The Student must state his authority for the Order and the building, which should not be of recent design.

Sheet 1: A general drawing of the building, sufficient to illustrate the application of the Order or Orders, with section of the façade wall, and plans of the façade wall in the storeys where the Orders occur.

Sheet 2: Details of the Order or Orders.

B.—FREEHAND DRAWINGS. *Sheet 3*: Classic Ornament or Mediæval Ornament. Freehand drawing from the round.

C.—MEASURED DRAWINGS. *Sheets 4 and 5*: Measured drawings of an existing building or portion of a building, not of recent construction, to be selected by the Candidate. His plottings and sketches are also to be submitted.

D.—CONSTRUCTION APPLIED TO ELEMENTARY DESIGN. Working drawings of a domestic building of moderate dimensions, designed by the Candidate, showing clearly the construction of floors, roofs, joinery, etc.

The quality of design will be considered and work not reaching a reasonable standard of simple design will be disqualified on that ground.

Sheet 6: General drawings to a scale of 8 feet to 1 inch.

Sheet 7: A comprehensive $\frac{1}{2}$ -inch detail.

Sheet 8: Some full-size details.

* To be obtained at the Office of the Institute, and to be sent in, with the Testimonies of Study, on the dates specified in the ALMANAC in the R.I.B.A. KALENDAR.

† The Council has decided to allow Candidates other than British subjects who wish to obtain evidence that they have obtained the status, though not the rank, of a Student of the Royal Institute to sit for the Intermediate Examination, and in the event of their passing, to furnish them with a certificate to that effect.

‡ In order to test the Probationer's knowledge of what he has drawn and described in his "Testimonies of Study," they are brought up at the Oral Examination, when he is required to answer questions respecting them.

Note.—Probationers who are Architectural Students of the Royal Academy are permitted in lieu of the Testimonies of Study Nos. 1 to 5 above specified, to submit for the approval of the Board of Architectural Education their work done in and for the Royal Academy School, provided that the drawings so submitted comprise studies applicable to sheets Nos. 4 and 5, prepared while a Student at the Royal Academy Schools.

Note.—Drawings prepared in any of the above Schools of Architecture recognised for exemption from the R.I.B.A. Examinations by Probationers R.I.B.A. may be submitted by such Probationers in lieu of the Testimonies of Study above set out, and if the work be approved by the Board, the Candidates will be admitted to the Examination.

* * Each of the eight sheets must be carefully finished as a complete work and bear the name of the Candidate. They must be delivered flat, in a portfolio 30 inches by 22 inches.

The carriage of the Testimonies of Study, etc., to and from the office of the Royal Institute, and all expenses incidental thereto, must be defrayed by the Candidate. They will be delivered on demand to any person authorised by the Candidate to receive them, but the Royal Institute will not incur any expense in returning them. Due care will be taken of such Testimonies of Study, etc., but the Royal Institute will not be responsible for any loss of or damage to them while they remain in its keeping or are in transit to or from the Royal Institute. All Relegated Candidates are required to bring their original Testimonies of Study to the Oral Examination.

PARA. 4. DETAILS OF EXAMINATION.

The Examination, which is known as the Intermediate, embraces the following subjects :—

- i. A Paper on the General History of Architecture.
- ii. A Specialised Paper on the History of Architecture of *one* of the following periods, to be selected by the Candidate :—(a) Greek and Roman ; (b) Byzantine and Romanesque ; (c) French and English Gothic ; (d) Italian, French and English Renaissance.
- iii. A Paper on the Calculations of Simple Structures.
- iv. Design.
- v. Two Papers on Constructional Design and the Properties and Uses of Building Materials.

PARA. 5. RELEGATED CANDIDATES.

Candidates relegated in the Examinations are required to pay a fee of 10s. 6d. for each subject in which they have been relegated on each occasion upon which they present themselves for examination.

PARA. 6. ELECTION AS STUDENT.

The results of these Examinations are reported to the Council by the Board of Architectural Education, who recommend as to the fitness of the Candidates for election as Students, and return the names of those who pass in order of merit. On the approval of such recommendations the successful Candidates are eligible for election as Students, and their names and addresses are published in the JOURNAL of the Royal Institute, and also in the KALENDAR.

A fee of £1. 1s. is payable by all Students within two months of election and this fee is renewable on the 1st January each year. Students elected after the 31st October in any year and having paid their first election fee are not required to pay a further fee before the 1st day of January twelve-month subsequent to their election.

A Student is entitled to use the R.I.B.A. Library; to attend general meetings, other than business meetings; to receive the R.I.B.A. Journal, Kalendar and Annual Report; and to the use of the R.I.B.A. register of Assistants seeking employment. On successfully passing the Final Examination (to be passed by Students who have attained the age of at least 21 years) he is qualified, subject to the provisions of Section 8 of the Charter, for candidature as Associate R.I.B.A.

Probationers are recommended before taking the Intermediate Examination to note that in the Examination a general standard of efficiency in writing and spelling is required. Candidates are liable to fail if they are found to be below the standard in respect of orthography and general power of expression. Registration as Probationer does not guarantee that the Examiners will necessarily be satisfied with a Candidate's proficiency in these respects.

In their written answers, Candidates must confine themselves strictly to the questions, which should be dealt with concisely in clear straightforward English. This will be taken into consideration in the award of marks.

Section III. The Final Stage. Qualification for Candidature as Associate.

PARA. I. EXEMPTIONS.

(a) *Schools of Architecture Recognised for Exemption from the R.I.B.A. Examinations.*

The following resolution of the Council permits exemption from its Final Examination, with the exceptions and safeguards therein stated, under certain conditions, to Schools of Architecture.

"The Council of the Royal Institute of British Architects will, subject to proper safeguards, recognise for exemption from its Final Examination (*with the exception of that portion of the Examination which deals with Professional Practice*) such Schools as have set up a five years' Diploma or Degree course which the Council can approve, provided that in judging all designs submitted for the Diploma or Degree there be two External Examiners, approved by the Council, with power of veto."

Such courses have been established by—

Aberdeen, Robert Gordon's Colleges,
Edinburgh College of Art,
Glasgow School of Architecture,
Liverpool University, School of Architecture,
London, The Architectural Association,
London University, School of Architecture,
Manchester University, School of Architecture,
Montreal, McGill University, School of Architecture,
Sydney University, School of Architecture,

and the exemption above defined is granted to these schools.

Note.—It is laid down that in all schools thus recognised for the purpose of the Final Examination, an examination to the approval of the External Examiners is to be held in (1) Design, (2) Advanced Applied Construction, (3) Advanced Theoretical Construction (including structural steel and ferro-concrete), (4) Materials, (5) Sanitation ; and, further, that such schools submit annually for exhibition at the R.I.B.A. two designs (one of which must be carried to the stage of working drawings) from each Student exempted.

Members or Students of the R.I.B.A. holding a Degree or Diploma in Architecture which carries with it the privilege of exemption, on the usual conditions, from the R.I.B.A. Final Examination, may have that distinction indicated against their names in the R.I.B.A. KALENDAR.

Students of Schools of Architecture Recognised for Exemption from the R.I.B.A. Examinations who are entitled to exemption from the R.I.B.A. Final Examination, are required to come up for election as Associates within two years of the completion of their school course exempting them from the Final Examination.

Students who do not present themselves for election as Associates within these two years, except with special permission of the Board, shall be required to take the R.I.B.A. Final Examination in the usual way if they wish to qualify for candidature as Associates.

(b) Special Exemptions.

The Council has decided to exempt the holder of the Rome Scholarship from the Final Examination under the usual conditions at the conclusion of his three years' study abroad, and the Henry Jarvis Student after his two years' study abroad, provided that their work is approved by the Board.

Candidates who have been awarded the Soane Medallion, Victory Scholarship, or Tite Prize, or have received Certificates of Hon. Mention in either of these competitions, will be eligible to apply for exemption from the design portion of the Final Examination.

PARA. 2. DESCRIPTION OF EXAMINATION FOR STUDENTS NOT IN SCHOOLS OF ARCHITECTURE RECOGNISED FOR EXEMPTION FROM THE R.I.B.A. EXAMINATIONS.

An Examination (Written, Graphic, and Oral) of Students of the Royal Institute of British Architects is held by the Royal Institute twice a year, in the months of July and December, in accordance with the particulars given on the official form to be obtained at the Institute.

A Student R.I.B.A. who has attained the age of at least 21 years, and who is desirous of qualifying for candidature as Associate R.I.B.A., must make an application on the official form, to be filled up as directed thereon, and to be accompanied by a remittance of six guineas, which will be returned should the application be refused. He must also send with his application four accepted "Problems in Design," accompanied by a certificate from a member of the Royal Institute, or other person of recognised position, that the Student is a proper person to be admitted to this Examination.*

* The Council has decided to allow Candidates other than British subjects who wish to obtain evidence that they have obtained the status, though not the rank of an Associate of the Royal Institute, to sit for the Final Examination, and in the event of their passing, to furnish them with a certificate to that effect.

PARA. 3. PROBLEMS IN DESIGN.

Alternative Problems in Design, set for Candidates by the Board of Architectural Education, will be published yearly in January in the JOURNAL of the Royal Institute and the professional journals. Every Candidate will be required to submit Designs in answer to at least four of these problems, one of which must be a constructional subject. The Designs, when they have been submitted to and approved by the Board, will be considered as qualifying the Student to enter for the Examination. The Designs so submitted and approved will be marked by the Examiners. Competitors in the Final Competition for the Soane Medallion, Victory Scholarship, or Tite Prize will be exempted from one at least of the Testimonies of Study required for the Final Examination. Designs prepared at the Royal Academy Ateliers and also at the Schools of Architecture recognised for exemption from the R.I.B.A. Examinations may be submitted for approval by Candidates for admission to the Final Examination in lieu of the same number of R.I.B.A. Problems in Design. Students in the Royal Academy School may submit, in lieu of the alternative Problems in Design, the Designs made by them at the Royal Academy, provided that the same are approved and initialled by the visitor.

The carriage of the Problems in Design to and from the office of the Royal Institute, and all expenses incidental thereto, must be defrayed by the owners. They will be delivered on demand to any person authorised by the owner to receive them, but the Royal Institute will not incur any expense in returning them. Due care will be taken of the drawings, but the Royal Institute will not be responsible for any loss of or damage to them while they remain in its keeping or are in transit to or from the Royal Institute. All relegated Candidates must bring their Problems in Design to the Oral Examination.

PARA. 4. THESIS.

The Candidate must submit a Thesis showing advanced and individual work. This Thesis may be either an illustrated Essay, or a Design with a detailed report, and it is suggested that the Thesis should deal with one only of the following subjects :—

1. HISTORICAL ARCHITECTURE—implying as far as possible the direct study of actual historical buildings.

2. SCIENCE, AS APPLIED TO BUILDINGS.—By this is intended a special study of an application of science to definite problems of building, such as acoustics, electrical or engineering requirements, or a critical essay on recent developments in methods of building.

3. DESIGN, INCLUDING DECORATION—such as a study in Civic Monumental or Decorative examples or other types of architectural design.

The subject selected for the Thesis is to be notified for the approval of the Board, and the Thesis itself is to be submitted with the Candidate's application. The Thesis will be assessed by Examiners specially appointed for the purpose, who will also examine the Candidate orally in his Thesis if necessary. It is open to Candidates to obtain distinction in the advanced work, and such distinction will be appended to the Candidate's name in the

KALENDAR. This mark of distinction will only be given to Candidates who pass the examination at one sitting.

To obtain distinction the Candidate's Thesis must show some original work and deductions of value. Mere textbook extracts, devoid of reasoned original comment, will not be regarded by the Examiners as sufficient to merit pass marks.

Where the Candidate submits an analytical criticism of existing buildings, unless the original rough sketches used for taking dimensions are attached, it will be assumed that such drawings have not been plotted to scale from actual measurements.

Photographs have comparatively little value, unless shown to be specially taken.

An Essay submitted in competition for the Royal Institute Silver Medal for an Essay may be sent in as the Thesis.

PARA. 5. DETAILS OF EXAMINATION.

The Examination is divided into two parts which may, if the Candidate so desires, be taken separately, at an interval of not more than one year :—

Subject A. Design.

PART II.

THE R.I.B.A. LONDON ARCHITECTURE MEDAL.

With a view to encouraging excellence of design in street architecture it has been decided to examine annually the buildings completed during the three years ending 31st December, within a radius of four miles from Charing Cross, and to award a Medal for the design of a building of exceptional merit.

THE MEDAL.—The architect of the selected building will receive a bronze medal, presented by the Royal Institute, together with a diploma signed by the Jury. A suitable tablet will be affixed to the chosen building.

CONDITIONS.—(a) The building must front to a street, road, square or court, to which the public has access within the four-mile radius. The award is not intended for churches or public buildings. (b) The architect whose name is submitted must himself be the designer of the building. (c) Any member of the Royal Institute shall be at liberty to nominate any building (not excluding his own work) for consideration by the Jury. Forms of Nomination will be issued with the first two numbers of the Journal in each Session. These forms must be in the hands of the Secretary R.I.B.A. by the end of February. The Jury do not bind themselves to confine their selection to the buildings nominated.

SCALE OF PROFESSIONAL CHARGES.*

First issued in 1872 ; Revised in 1898 and 1919.

CONDITIONS OF ENGAGEMENT.

The Architect is employed subject to the following Conditions founded upon the Customs of the Profession, and his remuneration is payable according to the Scale of Charges hereinafter stated, which Scale is fixed and accepted on the basis of the same Conditions :—

(a) That the general supervision which the Architect will give to the work is such periodical inspection by him or his deputy as may be necessary to ensure that the work is being carried out in accordance with his design, but constant superintendence of the works does not form part of the duties undertaken by him and is not included for in the following Scale of Charges.

(b) That in all cases in which constant superintendence is required a Clerk of Works shall be employed for this purpose. He shall be nominated or approved by the Architect and appointed and paid by the Client. He shall be under the Architect's direction and control, but the Architect shall not be held responsible for any fraud or negligence on the part of the Clerk of Works.

(c) That the issue of a certificate by the Architect for a payment to the Contractor implies only that in the Architect's opinion work has been done at the date of the certificate to the value stated thereon, and to the best of his belief in accordance with the contract or order. No certificate, however, whether final or otherwise, shall be held to render the Architect responsible for improper execution of the work or for any breach by the Contractor of the terms of the contract or order.

(d) That the Architect has authority to give such orders on behalf of the Client as are necessitated in the Client's interests by constructional emergencies.

(e) That the Architect is empowered to make such deviations, alterations, additions, and omissions, as he may reasonably consider desirable in the Client's interests in carrying out the works, provided that no material addition to the cost of the contract or order is caused thereby.

* To be obtained at the office of the Institute, price threepence.

(f) That the fees of any Consultant or Consultants retained for any part of the work with the concurrence of the Client shall be paid for by the Client.

(g) That in all cases in which any projected work is not proceeded with for a period of two years after drawings have been prepared the Architect's services shall be paid for as for abandoned work.

(h) That all drawings, specifications, and documents prepared by the Architect shall remain his property, the copyright in the same being reserved to him.

(i) That the cost of the preparation of quantities, the measurement and valuation of variations, additions, omissions, and the preparation of the statement of accounts is not included in the Charges named in Clauses Nos. 1 to 8, but is to be paid in addition thereto.

Clause 1.—For taking the Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, preparing drawings and specifications for the purpose of estimates, obtaining tenders, advising on tenders and in preparation of contract, selecting and instructing Consultants, furnishing to the Contractor one copy of the drawings and specification and such other details as are necessary for the proper carrying out of the works, general supervision as above defined, issuing certificates for payment, and passing and certifying accounts, the charge in respect of new works is to be a percentage on the total cost of all executed works as follows :—

(a) If the contract or order exceeds £2,000 the percentage is to be 6 per cent.

(b) If the contract or order does not exceed £2,000 the percentage is to be 10 per cent. in the case of works costing £100, graduated to 6 per cent. in the case of works costing £2,000 as the special character of such works may render appropriate.

Clause 2.—In the case of alterations of and additions to existing buildings a higher percentage may be charged, not exceeding twice the amount due under Clause 1 for new works of the same cost.

Clause 3.—In works in which designs for fittings, appointments, decorations, or complex detail or construction are main features, special fees may be charged according to the circumstances, and also for designs for furniture.

Clause 4.—In addition to the percentage on the total cost of executed works, the architect is to be paid in respect of all works included in the tender or order, but not executed, two-thirds of the charge which would have been due upon them had they been carried out.

Clause 5.—If the project or part of it be abandoned, or if the services of the Architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the works abandoned or for which the Architect was employed (as the case may be) are as follows :—

(a) For taking Client's instructions, preparing sketch design, and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

(b) For taking Client's instructions, preparing sketch design, making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the percentage stated in Clauses 1 or 2 (as the case may be) on the estimated cost of such works.

SCALE OF ARCHITECTS' CHARGES FOR HOUSING WORK.*

With the object of assisting in the solution of the National Housing Problem, and having in view the necessity for the employment of qualified Architects on housing work, the members of the Royal Institute of British Architects assembled in general meeting have resolved to modify their charges in connection with housing schemes for Local Authorities and Public Utility Societies and have agreed to accept the following reduced scale of charges for such work.

The conditions of engagement of architects and surveyors shall be those which are customary in their respective professions, such as the conditions prescribed by the Royal Institute of British Architects in the case of the engagement of architects.

A. Preparation of Lay-out Plans for Cottages or Two-storey Flats and Tenements.

Note.—In calculating architects' fees for the preparation of lay-out plans the number of houses shall be understood to mean the number of houses on any one site.

For the preparation of a plan or scheme from existing maps, showing roads, builders' plots and buildings in block, including :—

- (1) Conference with local authorities and their officials.
- (2) Lay-out plan (where necessary) to 1/2500 scale.
- (3) Detailed lay-out plan or plans to 1/500 scale.

But exclusive of the preparation of detailed plans of buildings :—

For the first 25 houses	£1	0	0	per house.
For the next 75 houses	10	0	„	
For the remainder	7	6	„	

In cases where the number of houses has not been determined the fee shall be based on an average of 12 houses per acre. If a fully contoured plan of the site is not provided by the local authority an extra charge shall be made by the architect for taking levels of the site based on the time expended. This clause does not apply to the lay-out for flats or tenements exceeding two storeys in height, the charge for which shall be governed by special circumstances.

If the carrying out of a lay-out scheme be abandoned, the architects' fees shall, nevertheless, be paid in full, provided that the preparation of the plans for such scheme has been completed by the architect.

B. Roads and Sewers.

In calculating architects' fees for roads and sewers, the number of houses shall be understood to mean the number of houses on any one site.

* To be obtained at the office of the Institute, price threepence.

(1) *Executed Works*.—For preparing working drawings and specifications for roads and sewers in accordance with the lay-out plans prepared under Section A, advising on the same and on the preparation of contract, furnishing to the contractor one copy of the drawings and specifications, general supervision, issuing certificates, passing and certifying the accounts :—

The charge shall be at the rate of £2 per house.

(2) *Abandoned Works*.—In the event of the work or part of it being abandoned the charge shall be as follows :—

If the preliminary scheme of roads, drains and sewers based on contour levels has been prepared, one-sixth of the full rate for executed works stated in Section B (1) above.

If, in addition, the roads have been pegged out and the levels taken for sections, two-sixths of the full rate for executed works.

If, in addition, the sections have been set up in accordance with the levels taken and embodied in the working drawings of roads and sewers, three-sixths of the full rate for executed works.

If, in addition, specifications have been prepared and all the work necessary for the purpose of obtaining tenders has been done, four-sixths of the full rate for executed works.

C. House Plans (*Cottages or Two-storey Flats*).

Note.—In calculating architects' fees for the preparation of plans for cottages or two-storey flats the number of houses shall be understood to mean the number of houses for which any individual architect may be employed. In the event of such houses being erected under a number of separate contracts an additional charge may be made for the extra work involved.

(1) *Executed Works*.—For taking instructions, preparing sketch designs, making approximate estimate of cost, preparing drawings and specifications, obtaining tenders, advising on tenders and on preparation of contract, selecting and instructing consultants, furnishing to the contractor one copy of the drawings and specifications, and such other details as are necessary for the proper carrying out of the works, general supervision, issuing certificates for payment, and passing and certifying accounts :—

The charge shall be six per cent. upon the cost of the first pair of houses of approved design, and in addition upon the cost of one house only of each further separate design.

"Cost" shall be understood to mean the *average* cost of a house, such average being calculated over the whole contract or contracts.

For repetition work the following charges shall apply :—

For the next 50 houses	£9	0	0	per house.
For the next 50 houses	8	0	0	"
For the next 100 houses	6	10	0	"

The respective numbers referred to include the original designs.

(2) *Abandoned Works*.—If the project or part of it be abandoned, or if the services of the architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the work abandoned or for which the architect was employed (as the case may be) are as follows :—

(a) For taking client's instructions, preparing sketch design and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the charges for executed work stated in Clause C (1) above.

(b) For taking client's instructions, preparing sketch designs, making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the charges for executed work stated in Clause C (1) above.

Charges for abandoned work shall be made in respect of houses up to the number of fifty only, and shall be based upon the average cost or approved estimated cost.

D. *Plans for Flats and Tenements exceeding Two Storeys in Height.*

Note.—In calculating architects' fees for the preparation of plans under this heading, the number of flats and tenements shall be understood to mean the number of flats and tenements for which any individual architect may be employed. In the event of such flats or tenements being erected under a number of separate contracts, an additional charge may be made for the extra work involved.

(1) *Executed Works.*—For taking instructions, preparing sketch designs, making approximate estimate of cost, preparing drawings and specifications, obtaining tenders, advising on tenders and on preparation of contract, selecting and instructing consultants, furnishing to the contractor one copy of the drawings and specifications, and such other details as are necessary for the proper carrying out of the works, general supervision, issuing certificates for payment, and passing and certifying accounts, the charge shall be as follows:—

(2) *Abandoned Works.*—If the project or part of it be abandoned, or if the services of the architect cease or are dispensed with before a contract is entered into or order given, the charges in respect of the work abandoned or for which the architect was employed (as the case may be) shall be as follows:—

(a) For taking client's instructions, preparing sketch design and making approximate estimate of cost by cubic measurement, or otherwise, one-fourth of the charges for executed works stated in Clause D (1) above.

(b) For taking client's instructions, preparing sketch design, and making approximate estimate of cost by cubic measurement, or otherwise, and preparing drawings and particulars sufficient to enable quantities to be prepared or a tender obtained, two-thirds of the charges for executed works stated in Clause D (1) above.

Charges for abandoned work shall be made in respect of flats and tenements up to the number of fifty only, and shall be based upon the average cost or approved estimated cost.

E. *Out-of-Pocket Expenses*.—This Scale is exclusive of reasonable travelling and out-of-pocket expenses.

F. *Supervision and Administrative Duties*.—In the event of a Local Authority or Public Utility Society desiring their officials to co-operate with the architect in supervision and other administrative duties, the architects' fees as set out in this Scale may be reduced accordingly.

REGULATIONS GOVERNING THE PROMOTION AND CONDUCT OF ARCHITECTURAL COMPETITIONS AS APPROVED BY THE ROYAL INSTITUTE OF BRITISH ARCHITECTS AND BY ITS ALLIED SOCIETIES.

[Re-issue after revision : December, 1910, February, 1921, March, 1924, and June, 1926.]

It is assumed that the object of the Promoters is to obtain the best design for the purpose in view. Where the Promoters desire to achieve this end by means of a Competition experience shows that this object may best be secured by conducting all Competitions upon the lines laid down in the following Regulations, which have been framed with a view to securing the best results to the Promoters with scrupulous fairness to the competitors.

Members of the Royal Institute of British Architects, and Members of its Allied Societies do not compete excepting under conditions based on these Regulations.

The Conditions of a Competition shall contain the following Regulations (A) to (F) as essential :—

(A) The nomination for every Competition of an Assessor or Assessors who shall be Architects of acknowledged standing to whom the whole of the designs shall be submitted.

(B) Each design shall be accompanied by a declaration, signed by the competitor, or joint competitors, stating that the design is his or their own personal work, and that the drawings have been prepared under his or their own supervision. A successful competitor must be prepared to satisfy the Assessor that he is the *bona fide* author of the design he has submitted.

(C) No Promoter of a Competition, and no Assessor engaged upon it, nor any employee of either, shall compete or ASSIST A COMPETITOR, or act as Architect, or joint Architect, for the proposed work.

(D) The premiums shall be paid in accordance with the Assessor's award, and the author of the design placed first by the Assessor shall be employed to carry out the work, unless the Assessor shall be satisfied that there is some valid objection to such employment, in which case the author of the design placed next in order of merit shall be employed, subject to a similar condition. The award of the Assessor shall not be varied for any other reason.

(E) If no instructions are given to the author of the design selected by the Assessor to proceed within twelve months from the date of the award, then he shall receive payment for his services in connection with the preparation of the Competition drawings of a sum equal to $1\frac{1}{2}$ per cent. on the amount of the estimated cost stated in the conditions up to £50,000, but if the estimated cost of the work exceeds £50,000 he shall be paid a sum equal to $1\frac{1}{2}$ per cent. upon the first £50,000, plus $\frac{1}{2}$ per cent. upon any sum in excess of that amount. The first premium shall be deducted from the sum so paid. If the work is subsequently proceeded with, this sum shall form part of his ultimate commission.

(F) The selected Architect having been appointed to carry out the work shall be paid in accordance with the Schedule of Charges sanctioned and published by the Royal Institute of British Architects, and the premium already paid shall be deemed to be a payment on account.

1. The Promoters of an intended Competition should, AS THEIR FIRST STEP, appoint one or more professional Assessors, Architects of acknowledged standing, whose appointment should be published in the original advertisements and instructions. The selection of an Assessor or of two or more Assessors to act as a Jury should be made with the greatest possible care, as the successful result of the Competition will depend very largely upon their experience and ability. The name or names of the Assessor or Assessors should always appear in the conditions governing a Competition or in any advertisement or other announcement relating thereto.

The usual R.I.B.A. Scale of Charges for Assessing Competitions is the sum of Fifty Guineas, plus one-fifth per cent. upon the estimated cost of the proposed building.

In the event of more than ONE ASSESSOR being appointed, the remuneration shall be decided by mutual arrangement between the Assessors and the Promoters.

The President of the Royal Institute of British Architects is always prepared to act as honorary adviser to Promoters in their appointment of Assessors.

2. The duties of Assessors are as follows :—

(a) To confer with and advise the Promoters on their requirements and on the questions of cost and premiums to be offered.

(b) To draw up instructions for the guidance of competitors and for the conduct of the Competition, incorporating the whole of the clauses of these Regulations which are applicable to the particular Competition.

Note.—It is essential in drawing up the Instructions to state definitely which of the conditions must be strictly adhered to, under penalty of disqualification from the Competition, and which of them are optional.

(c) To answer queries raised by competitors within a limited time during the preparation of the designs, such answers to be sent to all competitors.

(d) To examine all the designs submitted by competitors and to determine whether they conform to the Conditions and to exclude any which do not.

(e) To report to the Promoters on the designs not so excluded and to award the premiums in strict accordance with the Conditions.

(f) To inform the Promoters if necessary that modifications may be made in the winning design by the successful Architect, if so desired by the Promoters.

3. Competitions may be conducted in one of the following ways :—

(a) By advertisement, inviting Architects willing to compete for the intended work to send in designs. FOR COMPETITIONS FOR PUBLIC WORKS THIS METHOD IS RECOMMENDED.

(b) By advertisement, inviting Architects willing to compete for the intended work to send in their names by a given day, with such other information as they may think likely to advance their claims to be admitted to the Competition. From these names the Promoters, with the advice of the Assessors, shall select a limited number to compete, and each competitor thus selected shall receive a specified sum for the preparation of his design.

(c) By personal invitation to a limited number of selected Architects to join in a competition for the intended work. Each competitor shall receive a specified sum for the preparation of his design.

Note.—Where a deposit is required for supplying the Instructions it shall be returned on the receipt of a *bonâ fide* design, or if the applicant declines to compete and returns the said Instructions within four weeks of the date for submitting designs.

4. The number, scale, and method of finishing of the required drawings shall be distinctly set forth. The drawings shall not be more in number or to a larger scale than necessary clearly to explain the design, and such drawings shall be uniform in size, number, mode of colouring and mounting. As a general rule a scale of 16 feet to 1 inch will be found sufficient for plans, sections, and elevations, or, in the case of very large buildings, a smaller scale might suffice.

Unless the Assessors advise that perspective drawings are desirable, they shall not be admitted.

5. No design shall bear any motto or distinguishing mark ; but all designs shall be numbered by the Promoters in order of receipt.

6. A design shall be excluded from a Competition—

(a) If sent in after the period named (accidents in transit excepted) ;

(b) If it does not give substantially the accommodation asked for ;

(c) If it exceeds the limits of site as shown on the plan issued by the Promoters, the figured dimensions on which shall be adhered to ;

(d) If the Assessors shall determine that its probable cost will exceed by 10 per cent. the outlay stated in the Instructions, or the estimate of the competitor should no outlay be stated.

(e) If any of the Conditions or Instructions other than those of a suggestive character are disregarded ;

(f) If a competitor shall disclose his identity or attempt to influence the decision.

7. All designs and reports submitted in a Competition, except any excluded under Clause 6, together with a copy of the Assessor's Award, should be publicly exhibited for at least six days. Due notice shall be given to all competitors of the date and place of such exhibition. It is desirable that competitors should be furnished with a copy of the Assessor's Award.

8. All drawings submitted in a Competition, except those of the design selected to be carried out, shall be returned carriage paid to the competitors within fourteen days of the closing of the Exhibition.

9. The Conditions of a Competition issued by a Corporate Body should have the Common Seal of that body affixed thereto.

10. In the case of small, limited, private competitions where the Royal Institute are satisfied that special circumstances may exist, modification of these regulations may be approved by the Royal Institute.

Competitions coming within the scope of this Clause are :—

(i) Where the competing architects are limited by selection or invitation, and do not exceed six in number ; and

(ii) Where the proposed competition does not involve the expenditure of public funds.

Provided that nothing in this Clause shall prevent two or more members of the Royal Institute from giving advice or preparing sketch plans for the same project for a private client, if the expenditure proposed does not exceed the sum of £12,500, and if each of the members so invited be paid an agreed fee.

REGULATIONS FOR INTERNATIONAL ARCHITECTURAL COMPETITIONS.

*Settled at Paris, November, 1908, by the International Competitions Commission appointed by the VIIth International Congress of Architects (London, 1906).**

1. International Competitions should be reserved for exceptional occasions of a really international character.

2. International Competitions may be either open to all architects without invitation, or limited and by invitation.

Limited and invited Competitions may consist of a single stage.

Competitions open to all should be held preferably in two stages.

3. The " Conditions " of International Competitions are to be identical for all competitors.

No drawing, model or document shall be taken into consideration except those specified in the Conditions, nor shall any other drawing, model or document be exhibited.

4. The Instructions to Competitors should state definitely the Conditions of the Competition, and matters considered desirable should not be left to the option of Competitors.

5. In limited and invited Competitions, the Conditions should be fully detailed and require the scheme to be fully developed.

* See report of the British delegate, Mr. John W. Simpson, JOURNAL R.I.B.A., 9th January, 1909.

In Competitions open to all the Conditions should express the technical requirements in general terms and limit the number and scale of the drawings to the minimum necessary for the jury to understand the design.

The Conditions should require designs to be submitted anonymously under the motto in the first stage, and to be signed by the Authors in the second stage.

Competitors are forbidden under penalty of exclusion to act in any way which would tend to disclose their identity.

6. In double Competitions the Conditions in the first stage should be as those for Competitions open to all, and in the second stage as those for limited and invited Competitions.

Designs selected in the first stage only can be admitted to the second stage.

7. The Conditions of a Competition should be published and placed at the disposal of the Competitors as nearly as possible on the same date in all countries.

Any design not dispatched by the date of closing the Competition shall be excluded; the Carrier's receipt shall be accepted as proof.

8. The Conditions should be prepared in consultation with experienced Architects.

They shall be published in the French language.

9. The jury is to be nominated by the Promoters of the Competition; it is recommended that Promoters, before nominating the foreign members, should place themselves in communication with the Comité Permanent.

The jury of an International Competition shall be composed of Architects, each of different nationality, one of whom shall belong to the country which institutes the Competition. A legal authority, nominated by the Administration promoting the Competition, shall preside in order to ensure regular procedure, but shall have no vote.

The members of the jury, by accepting nomination, shall be held to have declared themselves to have no material interest, either directly or indirectly, in the result of the Competition.

10. It is desirable in International Competitions, and especially in the preliminary stages, that the limit of cost shall be only approximately fixed in order to leave some liberty to the artistic conception of Competitors.

When the sum available for carrying out the work is specified, the Conditions of Competition should give the information required for preparing approximate estimates on a uniform basis.

11. The total value of the premiums to be awarded shall be $2\frac{1}{2}$ per cent. on the cost for works not exceeding £100,000 in value, 2 per cent. on those not exceeding £200,000, and $1\frac{1}{2}$ per cent. for works beyond that value.

The principle must be enforced that the carrying out of the work be entrusted to the Architect placed first, subject to the conditions in force in the country promoting the Competition.

The amount of the prize shall not be deducted from the amount of the fees payable.

In the event of the person or Corporation promoting the Competition wishing to reserve the right to pass over the Architect placed first, the Conditions of Competition must state the terms of compensation.

Should the work not be executed, the same compensation shall be due.

In all cases the authors of designs submitted retain the artistic copyright in their design, and in the building which is a reproduction thereof.

12. In single-stage Competitions all the designs shall be exhibited in a suitable place and for a sufficient time to enable all Competitors to visit the Exhibition, which should be advertised beforehand in the professional papers.

In double Competitions there shall be no Exhibition after the first award; all the drawings shall be placed under seal and exhibited subsequently, together with the designs in the final Competition.

The authors of designs selected in the first stage shall have the right to make tracings thereof for use in preparing their final designs.

The full report of the jury, giving their reasons for the award, shall be published before the opening of the Exhibition and communicated to all the parties interested.

GENERAL ADVICE TO PROMOTERS AND OTHERS REGARDING THE CONSERVATION AND REPAIR OF ANCIENT BUILDINGS.*

[First issued in 1865, revised and enlarged in 1888, and re-cast in 1926.]

GENERAL PRINCIPLES.

Few subjects are more generally misunderstood than that relating to the repair or conservation of ancient buildings. Whether clergy or laymen, the promoters of the so-called restoration of old buildings, are often more bent upon altering old work or carrying out new works than on preserving what exists. It cannot, therefore, be too strongly insisted that renewal should be avoided, and this even when such a process would be effective from a practical standpoint, for every renewal changes the character of old work. The object should be to preserve carefully an ancient building, be it ecclesiastical or other, by repairs carried out with sympathy and reserve so that it may continue to be an authentic specimen of the ancient art of our country. Every old building has its historical value, and is a physical expression of the craftsmanship of past ages, and it should be remembered that these values are lost when authenticity is destroyed. Above all, no old

* To be obtained at the Office of the Institute, price One Shilling.

work should be destroyed, except under the most imperative necessity. The duty, therefore, of all concerned with ancient buildings is conservation, and this embraces every portion of original work.

Ancient buildings, generally, have been altered at various periods. All old work should be preserved to show the history of the fabric. A guard should be kept against the indulgence of individual preference for, or dislike of, particular features or styles, and especially against the theory once commonly held that a building must be purged of all features other than those of a favourite period.

It is upon the broad principles so outlined that the suggestions embodied in this document are based. It is intended that they shall be of use to those who are concerned with the preservation of old buildings and ancient examples of craftsmanship.

General Remarks.—The following suggestions and remarks have been drawn up with special reference to the repair of churches. The same spirit, however, ought to actuate those who have the care or ownership of ancient civil or military buildings, as from their comparative rarity they may be more valuable as historical monuments even than churches.

Old Materials.—It should not be forgotten that the practice of despoiling old buildings of materials, either for the repair of buildings or for other purposes, has resulted in the destruction of many valuable works. This practice cannot, therefore, be too strongly deprecated and should never be countenanced.

Preliminary Steps to be Taken.—Before any work is decided on a competent architect should be consulted. The architect should be one whose training and qualification are such as fit him to deal with work of conservation. He would make careful record drawings of the building, with measurements, of those parts which are likely to be affected, and photographs, including an indication of the scale, should be taken under his directions.

Deposit of Plans.—In the case of churches these photographs and copies of the drawings should be deposited with the Church Authority, and it is also suggested that they should be placed on the inventory to be seen by the archdeacon at his visitation.

Retention of Furniture, etc.—No clearance of objects such as furniture, old wall linings, pavements, flooring, galleries, pews, box-pews, wall partitions or other work of interest should be carried out except under imperative necessity.

Enquiry for Missing Portions of Old Work.—With a view to their preservation in a proper place, careful enquiry should be made for any portions of church furniture including masonry, old glass, stained or clear, brasses or other old works which may at any time have been removed from the building.

Floor Levels.—Ancient floors should be maintained. Only in cases where it appears certain upon investigation that the level of an existing floor is not the original should a change be considered.

Plastered Surfaces, Internal or External.—All plastered surfaces should be carefully examined with a view to discover any remains of painting upon them, and all ancient paint or whitewash cautiously cleaned, so that no injury

may be done to any painting, diapering, powdering or other decoration, if such exist. Where it is proposed to repair the roofs, all cleaning should be deferred until after the plastered surfaces are protected from the weather. Ancient plastered surfaces on walls and ceilings should, wherever possible, be preserved; and this often applies to external plastering, harling or rough cast.

Ancient Glass.—Ancient glass with the original leading and iron framework should be carefully preserved, and never allowed to be taken out of the building save for the purpose of necessary repair, and this only by competent workmen. It is seldom desirable to remove ancient glass from the place it occupies even when small fragments only remain. If new glass has to be put in old windows care should be taken to fit it to the irregularities of the tracery. Old clear or Crown glass should also be preserved. The possibility of placing in the windows old glass found during the work should be considered.

Stonework of Windows.—There are various ways of repairing the stonework of traceried windows, each of which is useful according to circumstances. The advice of an architect experienced in conservation work is especially necessary in such cases.

Ironwork of Windows.—Ancient ironwork of windows should be preserved, and if it shows signs of splitting the stone it should be carefully removed, have new copper ends welded on and as carefully reinstated.

Treatment of Stonework.—In the repair of walling no scraping or tooling of the surface should be permitted. The fact that masonry is decayed or damaged is not in itself a sufficient reason for re-building or renewal, and no new stonework should be used unless it is the best material to make the building structurally sound and weatherproof. Those parts only which are thus defective should be cut out and carefully renewed, but it does not follow that stone is the best material for the purpose. The same principles apply to walls of other materials.

Walls Out of Plumb.—Walls can usually be repaired without pulling them down. It is seldom necessary to straighten a wall which is not upright.

Old Roofs.—A new roof is rarely necessary where an ancient one exists; even if defective it can almost invariably be repaired. Often the ends of beams or rafters alone are decayed. Such timbers should not for this reason be discarded, but should be repaired by scarfing or otherwise. Where for some reason a new roof is to be put on ancient walls it should be constructed, preferably in English oak, without attempt to reproduce the forms of any past styles. Tie beams or rods should seldom be omitted in these circumstances.

The pitch of a new roof depends on many considerations. It must be left to the judgment of the architect, but indications of the old roof may be a guide.

Roof Coverings.—Old roof coverings—lead, tile, thatch, slate or stone—should be retained, and if repair is necessary new material of like nature should be procured. Worn-out lead should be re-cast.

Monuments, Effigies, etc.—In no case should anything be done to monumental effigies, brasses, figures, heraldic devices, foliage, or other such

works, either under cover or in the open beyond carefully cleaning or, when necessary, re-setting. Care should be taken to protect them from injury.

Fonts, etc.—Pulpits, fonts, piscinæ, etc., like other stonework, should on no account be scraped or re-tooled as has been too often the case. If these objects are to be brought into use, repairs for this purpose should be confined to essentials and not be allowed to extend to the renewal of decorative features.

Screens, etc.—Screens, seats and other furniture should not be removed from their original position. In this case, again, repairs should be confined to structural essentials.

Paintings.—Wall or other old paintings should not be touched nor, if covered, should attempt be made to expose them until expert advice has been obtained. Neglect of this precaution has resulted in irreparable damage to much valuable ancient work. For the preservation of wall paintings the first essential is that the wall itself shall be made safe from damp.

Fragmentary Remains.—The specification should contain a clause stipulating that the contractor has no claim upon old materials, excepting any which may be specially exempted. Fragments of sculpture, tiles, glass, metal work, and the like should be preserved in the building, with a record of the place in which they were found.

Contract.—It is nearly always undesirable to enter into a lump sum contract for repair works. It is, however, sometimes convenient to arrange contracts for sections of works of which the nature and precise extent can be determined beforehand. Repair work, because of its nature, must be of a piecemeal or conjectural character, and the danger of a lump sum contract is either that the contractor under-estimates—leading to unsatisfactory work—or he too amply covers himself, which causes a higher expenditure than is actually warranted. The architect will advise as to the best form of contract applicable to each case. A usual form of contract provides that the builder shall render an account of the time and materials, as directed by the architect, at a fixed rate of profit on the net cost of the work.

General Conclusion.—In the principles and methods advocated in this document the Royal Institute has the support of the Society for the Protection of Ancient Buildings, of 20, Buckingham Street, Adelphi, W.C.2. Working in co-operation with that body the Institute is in a favourable position to afford advice to those who may require it on the subject to which this document relates, particularly in those cases where doubt may exist as to the correct procedure to be followed to secure effective protection or preservation of ancient structures or old examples of craftsmanship.

Such enquiries, explaining the special circumstances on which advice is sought, should be addressed to the Secretary of the Royal Institute at No. 9, Conduit Street, Hanover Square, W.1.

Note.—Some supplementary information or advice, on points of technical detail, are appended to this document.

SUPPLEMENTARY ADVICE ON POINTS OF TECHNICAL DETAIL.

It is assumed that the work of repair will be directed by an architect and that no action of consequence will be taken without his definite instructions.

Excavation.—In making excavations in or about an ancient building, care should be taken to preserve every fragment of wrought stone, tiles or other ancient objects which may be met with. It is necessary to sift the earth in places where small objects are likely to be found.

Old foundations, bases of pillars, ancient tombs, stone coffins, pavements, or other work which appear to be in their original position should not be removed, but carefully exposed to view, in order that proper records of them may be made so that if possible they may be left permanently in their places.

In excavating and laying drains round old buildings projecting footings, however rough, should not be cut off and care should be taken in exposing them. Work which was clearly not intended to be exposed should not be left open to view or to the air. Drains should be so managed as to draw water from the foundations and not towards them.

Scaffolding.—Wherever scaffolding is necessary it should always be erected independent of the walls, and no support should be obtained from the walls themselves. A greater care should be taken to protect features liable to be damaged than is customary in new building work.

Stonework.—If it is necessary to clean off whitewash or paint from internal or other stonework, it should be remembered that the object of so doing is to bring to view the original surface and not to destroy it. The best way of removing the whitewash without in any degree disturbing, much less removing, the ancient surface must therefore be studied. The mode of tooling or working the ancient stone is a subject of interest, and the old tool marks must therefore not be damaged. If indications of ancient colouring be found on the surface of the stone the attention of the architect should be drawn to it before any attempt at exposing the colour is made.

The mode of removing whitewash depends much on the nature of the materials. In each case experiments should be made under direction to ascertain the best mode. It is preferable to leave the whitewash wholly or partially on the stone, rather than to use any tool which would damage the surface of the stone itself; for it is better to leave the old surface of the stone with the whitewash than to risk injuring it.

When in the course of repair traces of ancient string-courses, weatherings, windows, etc., are found, they should not be concealed again without instructions nor yet tooled off. No tool should be used upon the surface of ancient stonework.

Broken or decayed work should never be removed except where it is necessary to do so for the sake of stability, or where leaving it would be a source of danger. On no account should a stone be renewed simply because it has lost its original form; it is better to have broken or half-decayed authentic work than the most perfect reproduction. The cleaning of old work to make it harmonise with the new should be avoided. The old work is better left with its characteristic tone.

Lichen should not be removed from old surfaces except under expert direction.

In repairing walls, great care should be taken of any old mouldings or other wrought stones found embedded in them, and note taken of where they were found, for the fragments have usually been stowed away near to their original place. If windows or other features should be found, they should not be

disturbed until they have been seen by the architect. Encaustic tiling or other ancient paving should be preserved in the places where they are found. Ancient monumental remains should nearly always be kept in their old position.

Carving.—The same principles as are laid down for stonework apply to carving. The re-dressing or restoration of old carving should never be attempted.

Plaster.—If plastering is to be removed it should first be examined for old painting by carefully removing the whitewash here and there, and if it be found to retain old painting nothing further should be done until the attention of the architect has been called to it.

Ancient plastering, even when defective, should not be removed, but only repaired where necessary.

New plastering on old walls should be thin, and carefully tailed off to meet the stone dressing as in ancient work.

Woodwork.—An ancient roof, or other piece of timber work, should not be condemned simply because it is defective. An ancient roof carefully preserved by splicing and other means is infinitely more valuable than a copy of the same in new timber; and even very serious defects can be repaired if proper methods are employed. By failure to realise this possibility comparatively trifling defects have in the past been made the excuses for destroying some of the finest ancient roofs.

An old roof should never be entirely taken off for purposes of repair, but should be dealt with in its place, bay by bay, and should be kept dry by tarpaulin or other means during the operations. Exposure to wet is very harmful to old timber.

Old timber should not be coated with oil, varnish or stain.

All remains of coloured decoration on old woodwork should be preserved untouched with the greatest care.

Ancient seating should be preserved in its proper place, and any necessary repairs should be carried out on the spot if possible. Every remnant of old woodwork, of whatever description, should be carefully preserved and where possible kept in its place.

Leadwork.—When ancient lead on roofs is to be repaired or relaid, care should be taken to preserve any inscriptions or ornamentations which have been cast on to the old lead. When old lead has to be relaid, the old lead should be re-cast—on the site if possible—to at least seven or eight pounds per foot super, and the rolls should be hollow rolls. Milled lead should not be used on old buildings. It is as well to remember that lead should not be laid on oak boards or cement without some intervening substance as both materials quickly decompose the lead, turning it to whitelead powder.

Glass.—Great care should be taken to preserve ancient stained and clear Crown glass. It should never be removed from the windows in which it is found, however rough and imperfect it may be or however small the fragments, unless under special direction. It should be repaired carefully in its place.

Painting.—All remnants of ancient painting should be protected, and their preservation or cleaning should not be attempted unless under special direction; above all no attempt should be made to touch them up.

Ironwork.—All remnants of ancient metal work such as hinges, locks, casement fastenings, etc., should be preserved in their place if possible and old saddle-bars or stanchions should never be removed from windows except under instructions from the architect. Ordinary iron dowells or clamps should not be used where ancient ironwork, fixed into stone, is likely to split or has already split the stone. The ironwork should be removed carefully and metal substituted which will not corrode. In the case of ancient stanchions and saddle-bars in windows, copper ends should be welded on to the iron bars and carefully re-fixed.

Generally it needs to be borne in mind that the reparation of an ancient church or of any other ancient building, however simple it may be, is a work to be entered upon in a totally different spirit from that in which a new work is approached.

The object is not only to put the work into good repair, but to preserve and perpetuate an authentic specimen of the ancient crafts of our country. Every ancient building has historical value, and even though at first sight its state of disrepair may suggest renewal, or that the work might be better executed if done anew, it must be remembered *that all that value is gone when authenticity is destroyed*, and that not renewal but preservation is the duty of those charged with the work.

R.I.B.A. STANDARD SIZES OF BRICKS.

The accompanying diagrams* illustrate standard sizes of bricks which have been agreed upon with various bodies as indicated below. No. 1 (Diagram A) was agreed upon between the Institute and the Brickmakers' Association and was drafted as follows in consultation with these bodies and with representatives of the Institution of Civil Engineers in 1904:—

1. The length of the brick should be double the width, plus the thickness of one vertical joint.

* The new diagrams have been printed from blocks lent by the courtesy of the publishers of Specification.

2. Brickwork should measure four courses of bricks and four joints to a foot.

Joints should be $\frac{1}{4}$ inch thick and an extra $\frac{1}{8}$ inch, making $\frac{5}{8}$ inch for the bed joints to cover irregularities in the bricks. This gives a standard length of $9\frac{1}{2}$ inches centre to centre of joints.

The bricks, laid dry, to be measured in the following manner :—

(a) Eight stretchers laid square end and splay end in contact in a straight line to measure 72 inches.

(b) Eight headers laid side to side, frog upwards, in a straight line to measure 35 inches.

(c) Eight bricks, the first brick frog downwards and then alternately frog to frog and back to back, to measure $21\frac{1}{2}$ inches.

A margin of 1 inch less will be allowed as to (a), and $\frac{1}{2}$ inch less as to (b) and (c). This is to apply to all classes of walling bricks, both machine and hand-made.

In the early part of 1919 the Institute was requested to make some variations in the standard, and after consultation with the allied societies a conference was held on 28th June, 1919, at which were present representatives of the R.I.B.A., the Institute of Clayworkers, the President of the Northern Federation of Building and Engineering Brick Trades, the Secretary of the Employers' National Council for the Clay Industries, and representatives of the South-Western District and Midland District. It was reported that the Northern Federation, which represents the six northern counties, had come to an agreement with the Government to make the standard size for bricks $2\frac{1}{4}$ inches in height. The Conference recommended that a second standard size should be added to the R.I.B.A. standard, all the dimensions to agree with the present standard except that four courses of bricks and four joints are to measure 13 inches. The maximum depth of eight bricks, laid frog to frog and back to back alternately, to measure $23\frac{1}{2}$ inches. The minimum depth of eight bricks laid similarly to measure 23 inches. This was approved by the R.I.B.A. Council on 21st July, 1919.

The bed joints with the maximum bricks would be $\frac{1}{16}$ inch, and with the minimum $\frac{3}{8}$ inch to give 13 inches to four courses of bricks and four joints. This standard will apply to the counties of Northumberland, Cumberland, Durham, Westmorland, Yorkshire and Lancashire.

NATIONAL HEALTH AND PENSIONS INSURANCE.

THE ARCHITECTS' AND SURVEYORS' APPROVED SOCIETY.

(Approval Number 374).

26 BUCKINGHAM GATE, LONDON, S.W.1.

This Society was formed in 1912, with the approval of the Ministry of Health, and accepts for membership men and women, who come within the scope of National Health and Pensions Insurance, i.e. those in receipt of a salary not exceeding £250 per annum.

CONTRIBUTIONS.

The contribution for men is 1/6 per week, 9d. of which is payable by the employer; and for women 1/1 per week, 7d. of which is payable by the employer.

ORDINARY BENEFITS.

The ordinary benefits, as specified in the Acts, include sickness, disablement and maternity benefits; also pensions for widows and allowances for orphans. The Old Age Pension is payable for life at the rate of 10/- per week to an insured person on attaining the age of 65; also to the wife of an insured person on her attaining that age, irrespective of means.

ADDITIONAL BENEFITS.

The last Government valuation of the Society's assets having disclosed a large surplus, the following scheme of additional benefits has been brought into operation, with the sanction of the Ministry of Health:—

Sickness Benefit : 22/- per week for men, and 19/- per week for women.

Disablement Benefit : 11/- per week for both men and women.

Maternity Benefit : 54/-.

Grants are also made to members entitled to "Additional benefits" for the full cost of any dental, optical, hospital, nursing home and convalescent treatment required. Such members may choose their own dentists or oculists, but an estimate of cost of treatment should, before same is commenced, be submitted to the Society. Grants are also made under this scheme for the full cost of glasses, artificial teeth, and surgical appliances; also for the cost of trained nurses required during serious illness.

As these "additional benefits" are paid out of the profits of past years, those joining the Society now cannot expect to receive immediately such benefits.

Further particulars and forms of application for membership may be obtained from the undersigned.
